Circuit Sentry™ Flo-Setter
A PRESSURE INDEPENDENT BALANCING VALVE WHERE YOU CAN SET IT & FORGET IT!

- Maintains the set flow rate within +/- 5% regardless of pressure fluctuations in the system
- Saves pump energy and improves coil efficiency
Bell & Gossett Circuit Sentry™ Flo-Setter
Dynamic Balancing Valve Is Simple To Select And Easy To Use.

Why allocate more time and money than necessary to balance heating and cooling systems? Just set the flow and the Circuit Sentry™ Flo-Setter valve does the rest. The GPM dial is unique and easy to set. Once set, no adjustments are required even if the pressure varies or the system is changed. It is as simple as it gets.

The Circuit Sentry™ Flo-Setter valve is easy to install and maintains set flow rate even when installed next to a pipe bend or fitting. The easy to read gallons per minute scale on the lockable handle ensures that the flow setting is simple and user friendly while the integral P/T plugs allow verification of required differential pressure.

Externally adjustable flow limiter that provides hydronic balance for ultimate system efficiency

- The unique GPM dial is easy to set.
  Requires no instruments, charts or wheels
- Maintains the set flow rate within +/- 5% regardless of pressure fluctuations in the system
- Saves pump energy and improves coil efficiency
- Easy to install and lockable handle allows simple adjustment to design or required flow rate should specifications change
- Minimized commissioning time due to automatic balancing of the system
- No minimum straight pipe lengths required before or after the valve
- Integrated pressure / temperature ports to easily measure differential pressure and temperature
- Large open flow paths for clog-free operation

Measuring up against the others.

When Bell & Gossett is directly compared to others in lab tests, Circuit Sentry™ Flo-Setter operation and stability of flow is far superior. Trust Bell & Gossett to deliver the results that are needed for ultimate system efficiency - the others just don’t stack up.
Removable differential pressure cartridge solution simplifies flushing procedure.

Once the cartridge is in place, the revolutionary technology automatically keeps the flow stable regardless of the sudden pressure fluctuations in the system as long as the ∆P across the valve falls within the allowable range.

Built-in P/T ports for easy pressure reading which equates to easy commissioning.

With Bell & Gossett’s high quality construction, you can rest assured that your valve will operate trouble free.
