WS_BF Series
Model 3887BF 50 Hz
SUBMERSIBLE SEWAGE PUMP
FEATURES
Impeller: Cast iron, semi-open, non-clog, dynamically balanced with pump out vanes for mechanical seal protection. Optional silicon bronze impeller available.

Casing: Cast iron flanged volute type for maximum efficiency. Designed for easy installation on A10-20 slide rail.

Mechanical Seals: SILICON CARBIDE VS. SILICON CARBIDE sealing faces for superior abrasive resistance, stainless steel metal parts, BUNA-N elastomers.

Shaft: Corrosion resistant, 400 series stainless steel. Threaded design. Locknut on three phase models to guard against component damage on accidental reverse rotation.

Fasteners: 300 series stainless steel.

Capable of running dry without damage to components.

Designed for continuous operation, when fully submerged.

APPLICATIONS
Specifically designed for the following uses:
• Homes
• Sewage systems
• Dewatering/Effluent
• Water transfer
• Light industrial
• Commercial applications

Anywhere waste or drainage must be disposed of quickly, quietly and efficiently.

SPECIFICATIONS
Pump:
• Solids handling capabilities: 2” maximum
• Capacities: up to 160 GPM
• Total heads: up to 26 feet TDH
• Discharge size: 2” NPT threaded companion flange standard. 3” option available but must be ordered separately. (Order no. A1-3)
• 2” or 3” BSPP Connection (optional)
• Temperature:
  104°F (40°C) continuous
  140°F (60°C) intermittent.
• See order numbers on reverse side for specific HP, voltage, phase and RPMs available.

MOTORS
• Fully submerged in high grade turbine oil for lubrication and efficient heat transfer. All ratings are within the working limits of the motor.
• Class B insulation
• All single phase models feature capacitor start motors for maximum starting torque.

Single phase (50 Hz):
• Built-in overload with automatic reset.
• ½ and ½ HP – 16/3 SJTOW with bare leads.
• ¾ - 14/3 STOW with bare leads.

Three phase (50 Hz):
• Overload protection must be provided in starter unit.
• ½ -¾ HP - 14/4 STOW with bare leads.

• Designed for Continuous Operation: Pump ratings are within the motor manufacturer’s recommended working limits, can be operated continuously without damage.
• Bearings: Upper and lower heavy duty ball bearing construction.
• Power Cables: Severe duty rated, oil and water resistant. Epoxy seal on motor end provides secondary moisture barrier in case of outer jacket damage and to prevent oil wicking. 20 foot standard with optional lengths available.
• Motor Cover O-ring: Assures positive sealing against contaminant and oil leakage.
