# Red Jacket Water Products

Sump, Effluent and Sewage

Our Wastewater Pumps and Accessories will meet your needs, no matter what the task . . .

Our Submersible Sump Pumps are constructed of corrosion resistant materials for the durability you expect from Red Jacket wastewater products. Available in single phase, our sump pumps can handle solids up to ½" with flows up to 50 GPM.

The Red Jacket line of Effluent Pumps are built tough, to get the job done. Made from cast iron or stainless steel, these pumps handle solids up to ¾" and are available in both single phase and three phase. The discharge sizes range from 1½" to 2" NPT with flows up to 140 GPM.

Our rugged Submersible Sewage Pumps just never know when to quit. When you install a sewage pump you want it to work first time, every time. And that is exactly what you can expect with Red Jacket sewage pumps. These premium cast iron pumps will provide years of trouble-free operation. Our 2" solids handling, 2" discharge premium cast iron sewage pumps can produce flows up to 220 GPM and heads up to 82' TDH. Three inch discharge models create up to 64' TDH or flows to 470 GPM with motors between 1.5 and 5 HP. The four inch discharge pumps with 1.5 - 7.5 HP motors produce maximum flows to 620 GPM or heads to 60' TDH. The High Head Grinder Pump - 2 HP, 1¼" discharge - 100' head maximum and 41 GPM maximum.

The CentriPro™ line of Wastewater Accessories is just what you need to complete your installation. From packaged systems to basins, from duplex to simplex control panels, we have what you need to keep your business running.

Whether it is Sump, Effluent or Sewage pumps or accessories, Red Jacket has what you need to grow your business. Contact your local Red Jacket representatives for more information.

Red Jacket, we keep the water running.

## Red Jacket: A History of High Quality Performance

Pumps that wear the Red Jacket name have a reputation for excellence and engineered simplicity. It's been that way since Michigan inventor Robert Lafferty developed the first Red Jacket product more than 125 years ago – a double-action iron pump that used both the downward and upward thrusts of the handle to deliver water faster.

The spark of innovation that marked Red Jacket's beginnings has burned brightly throughout the company's history.

The Grizzly submersible and the Enduro stainless steel submersible pump further cement their leadership in the water systems market.

Today, the Red Jacket Water Products brand is part of the family of pump products from Xylem, the world's leading pump manufacturer. From its headquarters and factory in Auburn, New York, Red Jacket Water Products continues to manufacture and sell a full range of pumps that serve the water systems market. Its submersible, jet and centrifugal water pumps can be found in homes, farms, industries and municipalities around the world.

Now as part of Xylem, Red Jacket can utilize the corporation's experience, expertise and resources and build upon past success by introducing new and innovative products into new and existing professional markets.

Customers know the Red Jacket name stands for the highest quality standards in the industry. Today, as it has been for more than a century, the Red Jacket logo is a symbol of proven performance, reliability and innovation.

Red Jacket Water Products reserves the right to make design improvements and pricing modifications as necessary and without notice.
