Elevator Sump Pump Kit

OIL SMART - Staying dry and protecting the environment

The Oil Smart kits consist of panel, oil smart switch, liquid smart alarm sensor and pump. The setup allows water to be pumped from elevator sumps and transformer vaults without danger of pumping oil into sewers and waterways.

**FEATURES**

- Protects environment from hazardous waste
- The solid state device senses between oil and water
- Panel and switch kitted with sump/effluent 115V single phase pumps.
- Only operates pump if water is sensed by probes. Does not operate if oil is sensed by probes.
FEATURES FOR PUMP

- 1/6, 1/5, 115V, single phase pump
- Hard faced seal

Wiring Diagram

* Hook up separate 120V supply here or jump from pump terminal 1 and 3 to alarm terminal 6 and 7 for power.

* For 240V, remove jumper and supply power to terminals 1 and 2, with neutral on 3.
Xylem |ˈzɪləm|

1) The tissue in plants that brings water upward from the roots;
2) a leading global water technology company.

We’re a global team unified in a common purpose: creating advanced technology solutions to the world’s water challenges. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. Our products and services move, treat, analyze, monitor and return water to the environment, in public utility, industrial, residential and commercial building services, and agricultural settings. With its October 2016 acquisition of Sensus, Xylem added smart metering, network technologies and advanced data analytics for water, gas and electric utilities to its portfolio of solutions. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise with a strong focus on developing comprehensive, sustainable solutions.
