Motor dimensions are approximate and vary by manufacturer and motor type.

Distance to the next available hole.

Dimensions are subject to change. Not to be used for construction purposes unless certified.

Units may be built where foot/feet overhang the motor mounting platform. If overhang is unacceptable, consult factory for a custom submittal, quotation and/or lead time. A certified motor drawing will be required.

These dimensions are valid when using the Woods Duraflex spacer coupling option. For dimensions on Falk Steelflex coupling options, consult factory for a special submittal drawing.

For all customer supplied motors above 449 NEMA frame, a certified motor drawing must be supplied by the customer at the time of order entry.

†Submittal dimensions for motor frames above 449 NEMA are specific to ODP U.S. Electric Motors Only.
