New e-11M Switch utilizes our standard #11 switch (Included in kit).

Review IOM provided with the e-11M
Install #11 switch and cover.

Connect wires (provided with e-11M control kit) to #11 switch.

Install new e-11M switch enclosure using existing screws or ones provided with control kit.
e-11M Switch Installation Quick Guide

Connect all boiler wires per IOM. (In some cases it may require running neutral wire. Control requires constant power to operate).

Plug in harness from #11 switch into PC board.

Conduit connection

Reset button needs to be pressed to restart boiler after water level is restored.

Power on GREEN LED should be ON any time control has power.

RED LED indicates low water condition.

Check operation of low water cut-off several time before leaving job.
